OBJECTIVE

Aspiring software developer with expertise in Flutter, Node.js, and Firebase, passionate about building scalable and user-friendly solutions. Seeking to leverage my skills in a dynamic team to deliver impactful software applications.

EDUCATION

Lachoo Memorial College of science and technology   Jodhpur, Rajasthan
Master of Computer Applications   *2022 – 2024*

Lachoo Memorial College of science and technology   Jodhpur, Rajasthan
Bachelor in computer Applications   *2019 – 2022*

TECHNICAL SKILLS

Languages: Java, Dart, JavaScript, Typescript, HTML, CSS
Frameworks: Flutter, React Native Expo, Node, Express
Database: MySQL, PostgreSQL, MongoDB
Developer Tools: Firebase, Linux, VS Code, Android Studio, Neovim, Docker, Postman, Git/GitHub

EXPERIENCE

Flutter developer intern   Jan 2024 – May 2024
YugaTechno   *Jodhpur*

- Developed and optimized desktop applications for local business owners to manage customer data and generate invoices, enhancing business operations.
- Implemented custom keyboard bindings to streamline workflows and minimize mouse usage, tailoring the application to the owner's specific preferences.
- Built mobile applications using Flutter and Firebase, focusing on seamless integration and user-friendly interfaces.
- Acquired proficiency in Linux, mastering Vim motions, and configuring Neovim for an efficient development environment.

PROJECTS

Task Manager App | *Flutter, Node, Express, PostgresSql, Sqflite,Docker*
https://github.com/Abhishekbagdiya01/Task-Manager-App

- Built an offline-first task management app with Flutter, Sqflite, Node.js, Express and PostgreSQL.
- Implemented automatic online synchronization for offline data management, enabling seamless user experience.
- Engineered a containerized backend with Docker, enabling smooth local development and future deployment readiness.

AI Book Summary | *React Native Expo, Google Books API, Google Generative AI*
https://github.com/Abhishekbagdiya01/BookAI-Summary

- Developed a React Native Expo app that integrates with the Google Books API to fetch book information and generate AI-powered summaries.
- Utilized libraries like Tenstack Query and Google Generative AI for data fetching and summarization.

HappyTails - Pet Healthcare Application | *Flutter, Firebase*
https://github.com/Abhishekbagdiya01/HappyTails-Pet-appointment-app

- Developed a comprehensive app connecting pet owners with veterinary professionals, facilitating seamless appointment booking and consultations
- Enabled pet owners to create detailed pet profiles, browse doctor profiles, and engage in a social gathering forum.
- Focused on delivering an intuitive UI and robust features for both pet owners and veterinarians.

CERTIFICATES

Flutter Development from WsCube Tech
Docker Training Course for Absolute Beginners from KodeKloud
